Trends in the testing system

The most recent ratio of the number of persons who tested positive to the number of tests is 6.1%, indicating a decrease from the previous week.

* The ratio reached a record high of 8.8% at the time of the Declaration of a State of Emergency (Apr. 6 to 12). The ratio when the number of infections increased in July and August was 6.7% (Jul. 27 to Aug. 2).

Trends in the number of severe patients

The number of severe patients is increasing with the increase in inpatients. The ratio to the number of beds secured for patients is also increasing, and is at a high level in some regions.

* Trends in the numbers of inpatients" are based on the “Surveillance of the Status of Care for Patients with the Novel Coronavirus Infection and the Number of Beds,” by the Ministry of Health, Labour and Welfare. In this surveillance, the results as of 0:00 on the presentation date are published. Regarding the number of severe patients, the subject criteria differ from those for data published prior to August 14. ↑, ↓, and → indicate an increase, a decrease, and the same level, respectively, compared to the previous week.
