### Trends in the testing system (number of tests, positive rate)
- The most recent ratio of the number of persons who tested positive to the number of tests is 6.6%, indicating an increase from the previous week.

* The ratio was a record high of 8.8% at the time of the Declaration of a State of Emergency (April 6 to 12). The ratio when the number of infections increased in July and August was 6.7% (Jul. 27 to Aug. 2).

* "Trends in the numbers of inpatients" are based on the "Surveillance of the Status of Care for Patients with the Novel Coronavirus Infection and the Number of Beds," by the Ministry of Health, Labour and Welfare. In this surveillance, the results as of 0:00 on the presentation date are published.

Regarding the number of severe patients, the subject criteria differ from those for data published before August 14. ↑, ↓, and → indicate an increase, a decrease, and the same level, respectively, compared to the previous week.
(1) No. of new infections reported

(2) No. of new infections (per 100,000 people)/Percentage of unlinked cases

(3) Test status

(4) No. of inpatients/No. of severe patients

(5) Bed occupancy rate

(6) No. of patients receiving treatment
