Latest infection status, etc.

○ Trends in the numbers of new cases of infection
(Per 100,000 people)

- The number of new cases of infection remains at a record high level, and a maximum state of alert is required regarding the infection status.

* "Trends in the numbers of inpatients" are based on the “Surveillance of Status of Care for Patients with Novel Coronavirus Infection and Number of Beds” by the Ministry of Health, Labour and Welfare. In this surveillance, the results as of 0:00 on the presentation date are published. Regarding the number of severe patients, the subject criteria differ from those for data published before August 14. ↑, ↓, and → indicate an increase, a decrease, and the same level, respectively, compared to the previous week.

* The previous highest rate had been 8.8% at the time of the Declaration of a State of Emergency (Apr. 6 to 12, 2020). The rate when the number of infections increased in July and August was 6.7% (Jul. 27 to Aug. 2, 2020).
(1) 新規感染者数
(2) No. of new cases of infection (per 100,000 people)/Percentage of unlinked cases
(3) Test status
(4) No. of inpatients/No. of severe patients
(5) Bed occupancy rate
(6) No. of patients receiving treatment

(1) No. of new cases of infection reported
No. of PCR tests performed (left scale)
No. of persons who tested positive/No. of PCR tests (right scale)

No. of patients receiving treatment (per 100,000 people) (right scale)
No. of patients under investigation
No. of patients receiving treatment at social welfare facilities, etc.
No. of patients staying at home
No. of patients recovering at accommodations
No. of persons receiving treatment at social welfare facilities, etc.
No. of persons under investigation
