* “Trends in the numbers of inpatients” are based on the “Surveillance of the Status of Care for Patients with the Novel Coronavirus Infection and the Number of Beds,” by the Ministry of Health, Labour and Welfare. With this surveillance, the results as of 0:00 on the presentation date are published.

↑, ↓, and → indicate an increase, a decrease, and the same level, respectively, compared to the previous week.

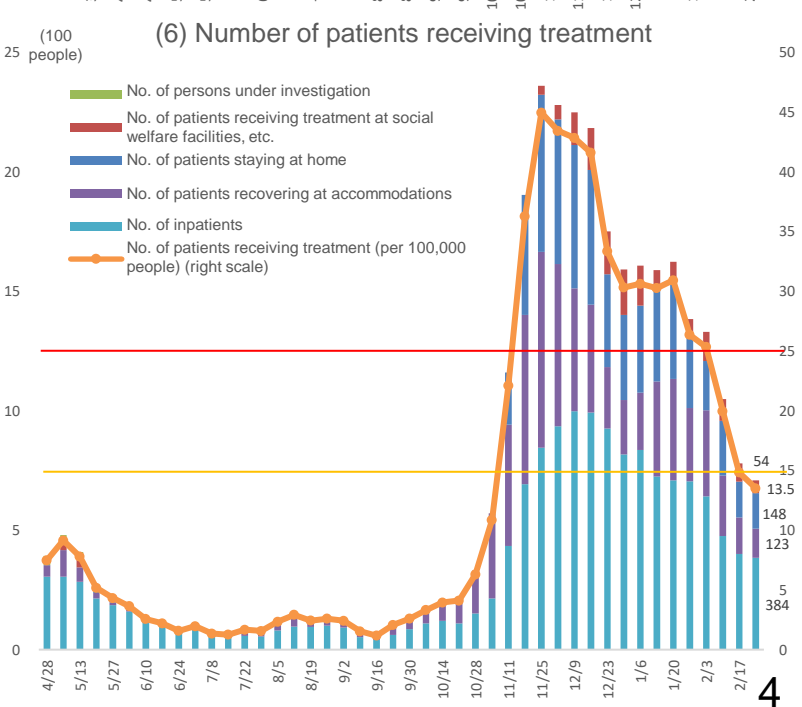

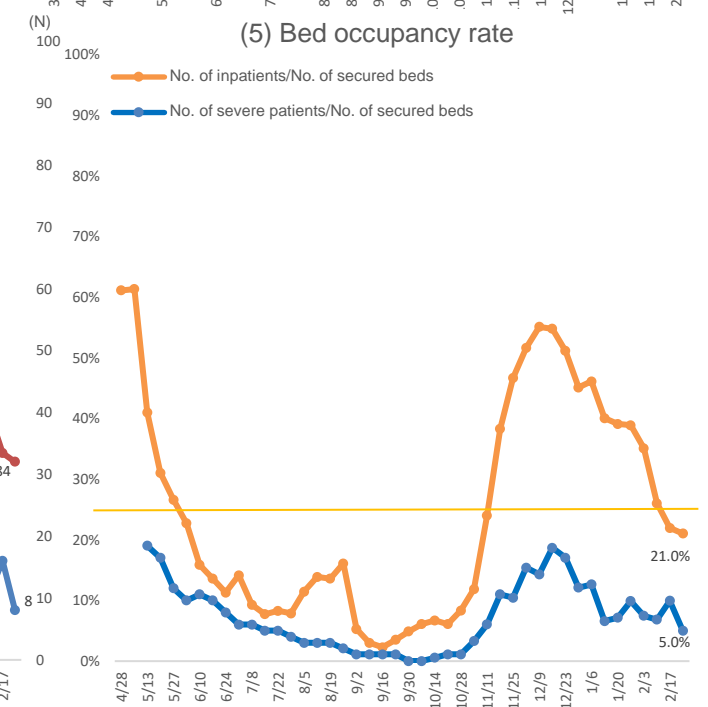

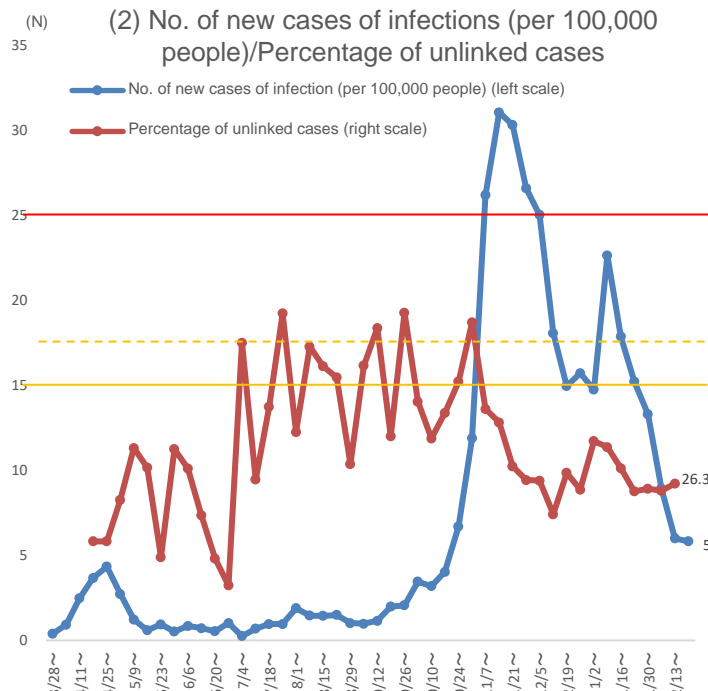

Note: Conventionally, the number of inpatients (numerator) has been based on the national standards (patients requiring management in intensive care unit [ICU], high care unit [HCU], etc., management with ventilator or extracorporeal lung assist [ECMO]), and the number of beds (denominator) has been the report based on the beds for patients requiring management with ventilator or extracorporeal lung assist [ECMO]. Currently denominators and numerators are the reports based on the national standards.

(Reference: The standards of Tokyo is about the beds for patients requiring management with ventilator or extracorporeal lung assist [ECMO])

Nationwide
