*“Trends in the numbers of inpatients” are based on the “Surveillance of the Status of Care for Patients with the Novel Coronavirus Infection and the Number of Beds,” by the Ministry of Health, Labour and Welfare. In this surveillance, the results as of 0:00 on the presentation date are published.*

↑, ↓, and → indicate an increase, a decrease, and the same level, respectively, compared to the previous week.
(1) No. of new cases of infection reported

- 20-59 years
- 19 years or younger
- Under investigation
- Unpublished

(2) No. of new cases of infection (per 100,000 of the population)/Percentage of unlinked cases

- No. of new cases of infection (per 100,000 of the population) (left scale)
- Percentage of unlinked cases (right scale)

(3) Test status

- No. of PCR tests performed (left scale)
- No. of test-positive persons/No. of PCR tests (right scale)

(4) No. of inpatients/No. of severe patients

- No. of inpatients (left scale)
- No. of severe patients (from Sep. 16, 2020) (right scale)
- No. of severe patients (from Aug. 26, 2020 to Sep. 16, 2020) (right scale)
- No. of severe patients (from Aug. 26, 2020) (right scale)

(5) Use rate of beds

- No. of inpatients/No. of secured beds
- No. of severe patients/No. of secured beds (until Aug. 26, 2020)
- No. of severe patients/No. of secured beds (from Aug. 26, 2020 to Sep. 16, 2020)
- No. of severe patients/No. of secured beds (from Sep. 16, 2020)

(6) No. of patients receiving treatment

- No. of patients receiving treatment (per 100,000 of the population) (left scale)
- Hospitalization rate (right scale)

* The numbers per 100,000 of the population were calculated based on the population estimations as of October 1 of each year by the Statistics Bureau of the Ministry of Internal Affairs and Communications until December 4, 2021, and the National population census in 2020 from December 5, 2021.
