</table>

*↑, ↓, and → indicate an increase, a decrease, and the same level, respectively, compared to the previous week.

*The number of tests represents the total number, including tests at the time of discharge. In particular, the "Number of persons who underwent an antigen test (sampling) (counted for each prefecture by public health institutes/public health centers and universities/medical facilities)" is added to the existing "Number of PCR tests performed (counted for each prefecture by public health institutes/public health centers, private inspection laboratories, and universities/medical facilities)" from March 28, 2022.

*The positive rate is calculated mechanically, with the number of new positive tests (including patients with pseudo-symptoms) based on the publication date in each prefecture as the numerator, and the number of tests (including tests at discharge) as the denominator. The results may exceed 100% due to the influence of delays in reporting the number of tests, so attention should be paid to interpreting the results in other prefectures.

*“Trends in the numbers of inpatients” are based on the “Surveillance of the Status of Care for Patients with the Novel Coronavirus Infection and the Number of Beds,” by the Ministry of Health, Labour and Welfare. In this surveillance, the results as of 0:00 on the presentation date are published.*

↑, ↓, and → indicate an increase, a decrease, and the same level, respectively, compared to the previous week.
(1) No. of new cases of infection reported

(2) No. of new cases of infection (per 100,000 of the population)/Percentage of unlinked cases

(3) Test status

(4) No. of inpatients/No. of severe patients

(5) Use rate of beds

(6) No. of patients receiving treatment

* The numbers per 100,000 of the population were calculated based on the population estimates as of October 1 of each year by the Statistics Bureau of the Ministry of Internal Affairs and Communications up to December 4, 2021, and the National population census in 2020 from December 5, 2021.
