

3. Department of Virology III

1. Takeda M, Tahara M, Nagata N, Seki F. (2011) Wild-type measles virus intrinsically dual-tropic. *Front Microbiol.* 2. 279
2. Seki F, Yamada K, Nakatsu Y, Okamura K, Yanagi Y, Nakayama T, Komase K, Takeda M. The SI Strain of Measles Virus Derived From an SSPE Patient Possesses Typical Genome Alterations and Unique Amino Acid Changes that Modulate Receptor Specificity and Reduce Membrane Fusion Activity. *J Virol.* 2011 85(22):11871-82.
3. Mori Y, Matsuura Y. Structure of hepatitis E viral particle. *Virus Res* 161(1):59-64. 2011.
4. Otsuki N, Abo H, Kubota T, Mori Y, Umino Y, Okamoto K, Takeda M, Komase K. Elucidation of the full genetic information of Japanese rubella vaccines and the genetic changes associated with in vitro and in vivo vaccine virus phenotypes. *Vaccine.* 29; 1863-1873 (2011).
5. Kidokoro M, Tuul R., Komase K., Nymadawa P. Characterization of mumps viruses circulating in Mongolia: identification of a novel cluster of genotype H. *J Clin Microbiol* 2011, 49, 1917-1925.
6. Kubota T, Matsuoka M, Xu S, Otsuki N, Takeda M, Kato A, and Ozato K. PIASy inhibits virus-induced and interferon-stimulated transcription through distinct mechanisms. *J Biol Chem.* 286: 8165-75 (2011)
7. Shirato K, Matsuyama S, Ujike M, and Taguchi F (2011). Role of proteases in the release of porcine epidemic diarrhea virus from infected cells. *J Virol.* 85:7872-7880
8. Shirato K, Maejima M, Matsuyama S, Ujike M, Miyazaki A, Takeyama N, Ikeda H, and Taguchi.F. (2011). Mutation in the cytoplasmic retrieval signal of porcine epidemic diarrhea virus spike (S) protein is responsible for enhanced fusion activity. *Virus Res.* 161(2):188-193.
9. Shirato K, Maeda K, Tsuda S, Suzuki K, Watanabe S, Shimoda H, Ueda N, Iha K, Taniguchi S, Kyuwa S, Endoh D, Matsuyama S, Kurane I, Saijo M, Morikawa S, Yoshikawa Y, Akashi H, Mizutani T. (2012). Detection of bat coronaviruses from *Miniopterus fuliginosus* in Japan. *Virus Genes.* 44(1):40-44
10. Shirato K, Ujike M, Kawase M, and Matsuyama S. (2012). Increased replication of respiratory syncytial virus in the presence of cytokeratin 8 and 18. *J Med Virol.* 84(2):365-370
11. Bankamp B, Takeda M, Zhang Y, Xu W, Rota PA. (2011) Genetic characterization of measles vaccine strains. *J Infect Dis.* 204. S533-48.
12. Tanaka T, Yokoi H, Kobayashi K, Iwanade H, Noguchi Y, Mitsui Y, Okamoto A, Saitoh M, Noda M, Takeda M, Okabe N, Kimura H. (2011) First detection of measles_virus_genotype G3 in a Japanese woman: an imported case. *Jpn J Infect Dis.* 64. 262-3.
13. Nakamura M, Taira K, Tsukagoshi H, Itokazu K, Nidaira M, Okano S, Kudaka J, Noda M, Takeda M, Kimura H. Detection of various respiratory viruses in patients with influenza-like illness before and after emergence of the 2009 Pandemic H1N1 influenza virus in Okinawa. *Jpn J Infect Dis.* 64(1):87-89, 2011.
14. Rota PA, Brown K, Mankertz A, Santibanez S, Shulga S, Muller CP, Hübschen JM, Siqueira M, Beirnes J, Ahmed H, Triki H, Al-Busaidy S, Dosseh A, Byabamazima C, Snit S, Akoua-Koffi C, Bwogi J, Bukenya H, Wairagkar N, Ramamurty N, Incomserb P, Pattamadilok S, Jee Y, Lim W, Xu W, Komase K, Takeda M, Tran T, Castillo-Solorzano C, Chenoweth P, Brown D, Mulders MN, Bellini WJ, Featherstone D. Global distribution of measles genotypes and measles molecular epidemiology. *J Infect Dis.* 2011 Jul; 204. Suppl 1: S514-23.
15. Mitsuki YY, Terahara K, Shibusawa K, Yamamoto T, Tsuchiya T, Mizukoshi F, Ishige M, Okada S, Kobayashi K, Morikawa Y, Nakayama T, Takeda M, Yanagi Y, Tsunetsugu-Yokota Y. (2012) HIV-1 Infection Ex Vivo Accelerates Measles Virus Infection by Upregulating Signaling Lymphocytic Activation Molecule (SLAM) in CD4+ T Cells. *J Virol.* 86. 7227-34.

16. Tran DN, Vu MP, Ha MT, Giang TPL, Komase K, Mizuguchi M, Ushijima H. Viral molecular characterization of the first congenital Rubella syndrome case in Vietnam. *Clin Lab.* 2011;57(5-6): 397-401.
17. Abernathy ES, Hübschen JM, Muller CP, Jin L, Brown D, Komase K, Mori Y, Xu W, Zhu Z, Siqueira MM, Shulga S, Tikhonova N, Pattamadilok S, Incomserb P, Smit SB, Akoua-Koffi C, Bwogi J, Lim WW, Woo GK, Triki H, Jee Y, Mulders MN, de Filippis AM, Ahmed H, Ramamurty N, Featherstone D, Icenogle JP. Status of global virologic surveillance for rubella viruses. *J Infect Dis.* 2011 Jul;204 Suppl 1:S524-32.
18. Featherstone DA, Rota PA, Icenogle J, Mulders MN, Jee Y, Ahmed H, de Filippis AM, Ramamurty N, Gavrilin E, Byabamazima C, Dosseh A, Xu W, Komase K, Tashiro M, Brown D, Bellini WJ, Strebel P. Expansion of the global measles and rubella laboratory network 2005-09. *J Infect Dis.* 2011 Jul;204 Suppl 1:S491-8.
19. Phengxay M, Hayakawa Y, Phan TG., Tanaka-Taya K, Ueno-Yamamoto K., Vongphrachanh P, Komase K, Ushijima H. Seroprevalence of rubella and measles virus antibody in Lao PDR. *Clin Lab.* 2011; 57(3-4):237-244.
20. Ito C, Ohgimoto S, Kato S, Sharma LB, Ayata M, Komase K, Takeuchi K, Ihara T, Ogura H. Remarkable similarity in genome nucleotide sequences between the Schwarz FF-8 and AIK-C measles virus vaccine strains and apparent nucleotide differences in the phosphoprotein gene. *Microbiol Immunol.* 2011 Jul;55(7):518-24.
21. Xin JY, Ihara T, Komase K, Nakayama T. Amino Acid Substitutions in Matrix, Fusion and Hemagglutinin Proteins of Wild Measles Virus for Adaptation to Vero Cells. *Intervirology.* 54; 217-228 (2011)
22. Sawada A, Komase K, Nakayama T. AIK-C measles vaccine expressing fusion protein of respiratory syncytial virus induces protective antibodies in cotton rats. *Vaccine.* 29; 1481-1490 (2011)
23. Katoh H, Mori Y, Kambara H, Abe T, Fukuhara T, Morita E, Moriishi K, Kamitani W, Matsuura Y. Heterogeneous nuclear ribonucleoprotein A2 participates in the replication of Japanese encephalitis virus through an interaction with viral proteins and RNA. *J Virol.* 85(21):10976-10988. 2011.
24. Oikawa N., Okumura A., Oyama S., Baba H. Shimizu T., Kato A. A 15-month old boy with reduced consciousness and convulsion. 53:276-279 (2012)
25. Hikichi M., Kidokoro M., T. Haraguchi, H. Iba, H. Shida, H. Tahara, T. Nakamura, MicroRNA regulation of glycoprotein B5R in oncolytic vaccinia virus reduces viral pathogenicity without impairing its antitumor efficacy. *Molecular Therapy* 2011, 19, 1107-1115.
26. Kashiwazaki H, Nomura R, Matsuyama S, Taguchi F, Watanabe R. Spongiform degeneration induced by neuropathogenic murine coronavirus infection. *Pathol Int.* 2011 Apr;61(4):184-91
27. Nomura R, Kashiwazaki H, Kakizaki M, Matsuyama S, Taguchi F, Watanabe R. Receptor-independent infection by mutant viruses newly isolated from the neuropathogenic mouse hepatitis virus srr7 detected through a combination of spinoculation and ultraviolet radiation. *Jpn J Infect Dis.* 2011;64(6):499-505.
