

### 3. Department of Virology III

1. Pratakipiriya W\*, Seki F\*, Otsuki N, Sakai K, Fukuhara H, Katamoto H, Hirai T, Maenaka K, Techangamsuwan S, Lan NT, Takeda M, Yamaguchi R. (\* these authors equally contributed to this work) Nectin4 is an epithelial cell receptor for canine distemper virus and involved in neurovirulence. *J Virol.* 86(18):10207–10, 2012
2. Sakai K, Nagata N, Ami Y, Seki F, Suzaki Y, Iwata-Yoshikawa N, Suzuki T, Fukushi S, Mizutani T, Yoshikawa T, Otsuki N, Kurane I, Komase K, Yamaguchi R, Hasegawa H, Saijo M, Takeda M, Morikawa S. Lethal canine distemper virus outbreak in cynomolgus monkeys in Japan in 2008. *Journal of Virology*, 87, 1105–1114. 2013
3. Sakai K, Yoshikawa T, Seki F, Fukushi S, Tahara M, Nagata N, Ami Y, Mizutani T, Kurane I, Yamaguchi R, Hasegawa H, Saijo M, Komase K, Morikawa S, Takeda M. (2013) Canine distemper virus associated with a lethal outbreak in monkeys can readily adapt to use human receptors. *J Virol.* 87:7170–5.
4. Tahara M, Ito Y, Brindley MA, Ma XM, He JL, Xu ST, Fukuhara H, Sakai K, Komase K, Rota PA, Plemper RK, Maenaka K and Takeda M. Functional and Structural Characterization of Neutralizing Epitopes of Measles Virus Hemagglutinin Protein. *J Virol.* 87(1):666–675, 2013
5. Tahara M, Ohno S, Sakai K, Ito Y, Fukuhara H, Komase K, Brindley MA, Rota PA, Plemper RK, Maenaka K, and Takeda M. The Receptor-binding Site of the Measles Virus Hemagglutinin Protein Itself Constitutes a Conserved Neutralizing Epitope. *J Virol.* 87:3583–6. 2013
6. Nakatsu Y, Ma X, Seki F, Suzuki T, Iwasaki M, Yanagi Y, Komase K, Takeda M. (2013) Intracellular transport of the measles virus ribonucleoprotein complex is mediated by Rab11A-positive recycling endosomes and drives virus release from the apical membrane of polarized epithelial cells. *J Virol.* 87:4683–93.
7. Otsuki N, Sekizuka T, Seki F, Sakai K, Kubota T, Nakatsu Y, Chen S, Fukuhara H, Maenaka K, Yamaguchi R, Kuroda M, Takeda M. Canine distemper virus with the intact C protein has the potential to replicate in human epithelial cells by using human nectin4 as a receptor. *Virology* 2013; 435:485–492
8. Shirato K, Maeda K, Tsuda S, Suzuki K, Watanabe S, Shimoda H, Ueda N, Iha K, Taniguchi S, Kyuwa S, Endoh D, Matsuyama S, Kurane I, Saijo M, Morikawa S, Yoshikawa Y, Akashi H, Mizutani T. (2012). Detection of bat coronaviruses from *Miniopterus fuliginosus* in Japan. *Virus Genes.* 44(1):40–44
9. Shirato K, Ujike M, Kawase M, and Matsuyama S. (2012). Increased replication of respiratory syncytial virus in the presence of cytokeratin 8 and 18. *J Med Virol.* 84(2):365–370
10. Shirato K, Kawase M, Watanabe O, Hirokawa C, Matsuyama S, Nishimura H, Taguchi F. (2012). Differences in neutralizing antigenicity between laboratory and clinical isolates of HCoV-229E isolated in Japan in 2004–2008 depend on the S1 region sequence of the spike protein. *J Gen Virol.* 93(9):1908–17.
11. Kawase M, Shirato K, van der Hoek L, Taguchi F, Matsuyama S. (2012). Simultaneous treatment of human bronchial epithelial cells with serine and cysteine protease inhibitors prevents severe acute respiratory syndrome coronavirus entry. *J Virol.* 86(12):6537–45.
12. Brindley MA, Takeda M, Plattet P, Plemper RK. (2012) Triggering the measles virus membrane fusion machinery. *Proc Natl Acad Sci U. S. A.* 109:E3018–27.
13. Ito M, Iwasaki M, Takeda M, Nakamura T, Yanagi Y, Ohno S. (2013) Measles virus non-structural C protein modulates viral RNA polymerase activity by interacting with a host protein SHCBP1. *J Virol.* 2013 Jun 26 [Epub ahead of print]
14. Mitsuki YY, Terahara K, Shibusawa K, Yamamoto T, Tsuchiya T, Mizukoshi F, Ishige M, Okada S, Kobayashi K, Morikawa Y, Nakayama T, Takeda M, Yanagi Y,

- Tsunetsugu-Yokota Y. (2012) HIV-1 Infection Ex Vivo Accelerates Measles Virus Infection by Upregulating Signaling Lymphocytic Activation Molecule (SLAM) in CD4+ T Cells. *J Virol.* 86. 7227-34.
15. Saitoh M, Takeda M, Gotoh K, Takeuchi F, Sekizuka T, Kuroda M, Mizuta K, Ryo A, Tanaka R, Ishii H, Takada H, Kozawa K, Yoshida A, Noda M, Okabe N, Kimura H. (2012) Molecular evolution of hemagglutinin (H) gene in measles virus genotypes D3, D5, D9, and H1. *PLoS One.* 7:e50660.
  16. Nakayama T, Sawada A, Kubo H, Kaida A, Tanaka T, Shigemoto N, Komase K, Takeda M. Simple method to differentiate measles vaccine from wild-type strains using loop - mediated isothermal amplification (LAMP). *Microbiol immunol.* 57(3): 246-51, 2013.
  17. Watanabe K, Watanabe K, Tazawa T, Kon M, Tamara T, Komase K. Imported cases of measles in Niigata, Japan in 2011. *Jpn J Infect Dis.* 65(3) 268-70, 2012
  18. Tran DN, Pham NT, Tran TT, Khamrin P, Thongprachum A, Komase K, Hayakawa Y, Mizuguchi M, Ushijima H. Phylogenetic analysis of rubella viruses in Viet Nam during 2009-2010. *J Med Virol.* 84(4):705-10, 2012
  19. Ohkura T, Kikuchi Y, Kono N, Itamura S, Komase K, Momose F, Morikawa Y. Epitope mapping of neutralizing monoclonal antibody in avian influenza A H5N1 virus hemagglutinin. *Biochem Biophys Res Commun.* 3; 418(1): 38-43, 2012
  20. Tripathi LP, Kambara H, Moriishi K, Morita E, Abe T, Mori Y, Chen YA, Matsuura Y, Mizuguchi K. Proteomic analysis of hepatitis C virus (HCV) core protein transfection and host regulator PA28gamma knockout in HCV pathogenesis: a network-based study. *J Proteome Res.* 2012; 11(7):3664-3679.
  21. Oikawa N., Okumura A., Oyama S., Baba H. Shimizu T., Kato A. A 15-month old boy with reduced consciousness and convulsion. 53:276-279 (2012)
  22. Ujike M, Huang C, Shirato K, Matsuyama S, Makino S, Taguchi F. (2012). Two palmitylated cysteine residues of the severe acute respiratory syndrome coronavirus spike (S) protein are critical for S incorporation into virus-like particles, but not for M-S co-localization. *J Gen Virol.* 93(4):823-8.
  23. Kotani O, Shirato K, Nagata N, Ikeda H, Takahashi K, and Taguchi F. (2013). Neuropathogenesis of a mouse-adapted porcine epidemic 1 diarrhea virus infection in suckling mice. *J. Gen Virol.* 94:831-6
